

Los Angeles Rail & Bus Rapid Transit > Current & Future

This guide is based primarily on Metro's Los Angeles County Traffic Improvement Plan: <http://theplan.metro.net/>

On planned lines, where mode, alignment, station locations and names have not been finalized, assumptions have been made.

Some existing stations have been renamed.

Most Metro lines are currently designated using colors. Metro has proposed naming lines using letters. Colors and letters used to represent planned lines have been assumed.

For more on individual projects: <https://www.metro.net/projects/>
